GONZALO HERRERA

SOFTWARE DEVELOPER

Salta, Argentina | herreragonzalodev@gmail.com | @Pekzer | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Software Developer and University Programming Technician, graduated from Universidad Nacional de Salta. Independent experience building custom software, web applications and websites, alongside IT support and hardware maintenance. Focused on software analysis and design, system structure, relational databases, and web and mobile development. Experienced in working directly with clients and collaborating on team projects.

PROFESSIONAL EXPERIENCE

Independent Software Developer | *Freelance | 2023–Present*

- Build custom applications and websites, translating client needs into functional software solutions.
- Provide IT support, troubleshooting, and computer hardware maintenance.
- Work directly with clients to gather requirements, define features, and deliver tailored solutions.

SELECTED PROJECTS

HIRPACE Web Application | *Laravel, PHP, React, PostgreSQL, Tailwind CSS*
Web platform for a rehabilitation organization, featuring editable content and modules designed for institutional management, medical records, appointments, and payments.

HomeStock | *React Native, Expo, TypeScript*
Mobile application for inventory and stock management, including low-stock notifications.

LloCA$Has | *React Native, Expo, Firebase*
Mobile application for tracking and managing shared savings accounts.

EDUCATION

University Programming Technician | *Universidad Nacional de Salta | 2021–2026*
Graduated. Coursework included software development, algorithms, data structures, computer architecture, databases, and software engineering.

High School Diploma, Computer Science Orientation | *Colegio de la Divina Misericordia | 2015–2019*

TECHNICAL SKILLS

Programming languages | *Java, Python, PHP, JavaScript, TypeScript, HTML, CSS*

Frameworks and platforms | *React, Laravel, Astro, React Native, Expo, Tailwind CSS, Vite, Firebase*

Databases | *PostgreSQL, MySQL, relational database design, entity-relationship modeling, and normalization*

Tools | *Git, GitHub, Docker, Node.js*

Core knowledge | *Data structures, algorithms, computer architecture, operating systems, software analysis and design, software testing, and data analysis*
